INTRODUCTION

Early American Coinage

The first mint established in this country was authorized by the General Court of Massachusetts in 1651 and began operation in Boston the following year. The NE, willow, oak and pine tree coins were the product of this mint. The Bermuda coinage antedates the above by over thirty years but could hardly have had any circulation in the colonies.

In 1658 the Lord Baltimore coins were planned for Maryland but never achieved any circulation as they were all short weight.

William Wood received a Royal Grant to strike copper coins for use in the colonies and his *Rosa Americana* pieces undoubtedly had some circulation here as well as his *Hibernia* halfpence which were not accepted in Ireland.

After the Revolution several of the states established their own mints, those of New Jersey and Connecticut having quite an extensive coinage of great interest to present day collectors.

The various experimental and trial pieces speak for themselves as little is known about them, except that a large proportion of them originated in England, evidently as an effort to secure contracts for the preparation of dies for a new coinage.

To the collector who acquires a really scientific interest in this series Crosby's "Early Coins of America" is the only standard work and the sixty years since the publication have added very little to the general knowledge of the subject.

Establishment of the Mint

The United States Mint was established in Philadelphia by an act of Congress dated April 6, 1792 and began operations in March of the following year.

The cents and half cents were struck in 1793, the silver dollar, half dollar and half dime in 1794 and the eagle and half eagle in 1795. In 1796 the quarter eagle, quarter dollar and dime were first coined. The eagle was the gold unit and had a standard weight of 270 grains, with a fineness of 916 $\frac{2}{3}$. The dollar was the silver unit and had a standard weight of 416 grains with a fineness of 892.4. The other gold and silver coins were in proportion. It was soon discovered that these units were undervalued and either being exported or sold as bullion, therefore in 1804 the coinage was stopped, only the smaller coins being continued. The law of 1834, amended in 1837, reduced the weight of the eagle to 258 grains of a fineness of 900 and this new coin was first issued in 1838. The law of 1837 reduced the weight of the silver dollar to 412 $\frac{1}{2}$ grains also of a fineness of 900. The law of 1834 having placed too low a valuation on silver many of the fractional coins were sold for bullion so that the law of 1853 reduced the weight of the half dollar to 192 grains making all the fractional silver coins subsidiary.

The act of 1873 made necessary an increase in the weight of the half dollar to 192.9 grains in order to conform with the authorized weight of 12.5 grams.

Private Gold Issues

The gold coins struck by private assayers and mints in the United States form one of the most interesting series in the numismatics of our country. The first of these were issued by Templeton Reid, who established a mint near the gold mines in Lumpkin County, Georgia. The next coins

were those struck by the Bechtlers, Christopher and August, from 1831 to 1842 or later. Their mint in Rutherford, N. C., struck pieces from the gold of Georgia and North Carolina to the amount of over two million dollars.

Upon the discovery of gold in California and the influx of prospectors and traders there was an immediate need for a medium of exchange other than the unwieldy bags of gold dust. Several firms struck coins in 1849 and the State Assay Office of California, with Frederick D. Kohler as State Assayer, began stamping ingots early in 1850; a few of these still exist. In the latter part of 1850 the firm of Moffat & Co. was designated as United States Assay representatives and Augustus Humbert of New York was appointed United States Assayer to place the government stamp upon the ingots produced by Moffat & Co. This business was in 1852 conducted under the name of the United States Assay Office.

The Mormon coinage grew out of the same necessity and appeared early in 1849. It did not, however, compare with the California coinages in actual intrinsic value. The firm of Clark, Gruber & Co. in Denver coined gold from the Colorado mines and produced over \$500,000 worth in 1860 and 1861. The Parsons and Conway companies were much smaller operators.

Way up in Oregon the same need for a medium of exchange produced the two pieces struck by the Oregon Exchange Co. in 1849.

Pattern Coins

The complete series of gold pattern types is now published and will be followed by the types of silver and minor patterns in future editions. Many of these are shown as an introduction to the subject.

Merchants Tokens

For the first time we are publishing a complete illustrated list of tokens issued before 1850 and used extensively as a medium of exchange. There is also an addenda giving the tokens issued between 1850 and 1863.

Hard Times Tokens

This very interesting series of political tokens struck between 1837 and 1841 is fully illustrated and described.

Paper Money

The entire paper money section of the 1939 catalogue has been enlarged and is now published as a separate book.

Compiler's Note

The Standard Catalogue offers this year the most reliable list of valuations on United States Coins ever assembled. They are based on auction and retail prices of the last two years and represent the ideas of many collectors and dealers. Many other special features are planned for coming editions and suggestions are always welcome.

Eagles—under eagle. After 1907—at left of value.

Double eagles—under eagle. After 1907—above date in rays.

Mottoes On Our Coins

The motto "E Pluribus Unum" first appears on the half eagle of 1795 being featured on the scroll above eagle, as copied from the Great Seal of the United States. "In God We Trust" first appears in 1864 when the Civil War had stirred up a great religious sentiment in the country.

Signatures on Coins

The mint engraver, J. B. Longacre, placed his initials on the double eagle of 1849 and on the Three Dollar piece issued in 1854, in both instances on the truncation of the neck. The 1864 and subsequent issues of the bronze cent have L on the ribbon hanging from bonnet.

The engraver, Geo. T. Morgan, placed an M on both sides of his design for the silver dollar of 1878. This shows on the truncation of the bust and on the wreath ribbon of reverse.

Charles E. Barber engraved a B on the truncation of the Liberty head on the 1892 silver dime, quarter and half dollar. The 1907 double eagle bears the initials A S G (Augustus St. Gaudens) under the date although he did not sign the eagle.

The new 1908 coinage of quarter and half eagles shows the initials B.L.P. (Bela L. Pratt) under the Indian head. The 1921 Peace dollar has the letter F under the head (Anthony de Francisci). The 1916 half dollar bears the initials of A. A. Weinman in monogram in the lower field of the reverse, also on the obverse of the dime.

The letter M appears at the base of the right portal on the 1916 quarter dollar and is the initial of Herman MacNeil.

James E. Fraser, the designer of the buffalo nickel placed an F under the date.

The Lincoln Cent of 1909 had the initials V.D.B. (Victor D. Brenner) on the reverse but being rather conspicuous they were removed before the end of the year, but later replaced under the shoulder in 1918.

Arrows At Date

The arrows on either side of date on coins of 1853, 1854 and 1855 indicate the reduction in weight while those on the coins of 1873 and 1874 indicate the slight increase.

The Condition of a Coin

PROOF—Specially struck coins with a mirror-like surface sold to collectors at the United States Mint.

UNCIRCULATED—A new coin never in circulation.

VERY FINE—From circulation but no signs of wear.

FINE—Slightest sign of wear but still an attractive piece.

VERY GOOD—Somewhat worn but still desirable.

GOOD—Worn but type all clear.

FAIR—Considerably worn and type does not all show.

Proof Coins

Proof coins, in all metals, were first struck at the mint for collectors in 1858. They have a mirror-like surface unlike the regular issues. All such pieces were originally sold at a premium. The U. S. mint abolished this practice in 1915 but resumed it again in 1936.

Valuations Quoted

Condition governs the price of a coin and some pieces are rarely met with in fine state; for this reason there may be a wide variation in price between good and fine preservation. This is especially true of the early American pieces and the first types of cents and half cents. An attractive color and appearance also adds to the value of such coins.

The valuations quoted on private gold coins are for fine cabinet specimens and on the regular United States gold issues for coins in very fine condition.

THE PATTERN CENTS OF 1856, 1858 AND 1859

PATTERN CENTS OF 1856, 1858, 1859

Top row—obverses. Lower row—reverses

- 1—1856 Flying eagle. Tobacco wreath as adopted in 1857. Pure nickel, copper-nickel, copper and bronze. The copper-nickel piece is the coin usually found, all the others are very rare. A variety is known with the date twice engraved.
- 2—1856 Flying eagle. Oak wreath and shield. Copper and copper-nickel. Very rare.
- 3—(1856) Eagle in plain field, no inscription or date. Nickel and copper. Very rare. Adams also mentions in copper-nickel, but I have never seen it nor have I seen the trial pieces to which he gives the numbers 214 and 215. These last, if they exist, are of such rarity that they may be rated as unobtainable.
- 4—1858 Large flying eagle. Tobacco wreath. Copper, copper-nickel and nickel. The first and last very rare.
- 5—1858 Large flying eagle. Oak wreath. Copper-nickel.
- 6—1858 Large flying eagle. Laurel wreath. Copper-nickel and copper. The last very rare.
- 7—1858 Large flying eagle. Oak wreath and shield. Copper-nickel.
- 8—1858 Small flying eagle. Tobacco wreath. Copper-nickel and copper. The last very rare.
- 9—1858 Small flying eagle. Oak wreath. Copper-nickel.
- 10—1858 Small flying eagle. Laurel wreath. Copper-nickel.
- 11—1858 Small flying eagle. Oak wreath and broad shield. Copper-nickel and copper. The last very rare.

- 13—1858 Indian head. Oak wreath. Copper-nickel.
- 14—1858 Indian head. Laurel wreath. Copper-nickel, copper and nickel. The last two very rare.
- 15—1858 Indian head. Oak wreath and broad shield. Copper-nickel. I have not seen the various other mulings described by Adams.
- 16—1859 Regular obverse. Reverse with oak wreath and narrow shield as adopted in 1860. Copper and copper-nickel.
- 17—1858 Regular obverse. Reverse with oak wreath and broad shield. Copper-nickel.
- 18—1859 Regular obverse. Reverse with heavy oak wreath. Copper-nickel. I have not seen the pattern described by Adams under number 314 with the tobacco wreath reverse. To complete this series of eighteen pieces in copper-nickel is a somewhat difficult task today.

HARD TIMES TOKENS OF 1832-1844

Lyman H. Low's famous list of one hundred and eighty-three Hard Times Tokens is a selection from among a much larger number of private issues put forth during a stirring period of twelve years. President Andrew Jackson disapproved of a fiscal system under which public funds were deposited in a single privately controlled institution, the Bank of the United States. On July 10, 1832, accepting the challenge of Henry Clay and the financial interests of the country, he vetoed a bill to continue the Bank in existence after the expiration of its charter in 1836. This action transformed the personal animosities of rival politicians into a sustained popular controversy over fundamental political principles. The already dominant Republican party of Thomas Jefferson split into two violently opposed groups. On the one side Clay's supporters, reinforced by former Federalists, fought vigorously to restore the Bank. After their failure, as "National-Republicans," to defeat Jackson for reelection in 1832, they broadened their ranks to include all who attacked his methods as dictatorial and unconstitutional, and campaigned under the name of "Whigs." On the other side the "Democratic-Republican" or, more briefly, the "Democratic" party of Jackson and of his successor Martin Van Buren not only succeeded in warding off these attacks but inaugurated supplementary reforms. They ceased to deposit governmental receipts in the central Bank while it was still alive. After state banks had shown themselves to be unsafe depositories, they established the independent sub-treasury system. They were responsible also for changing the coinage ratio of gold and silver so as to bring gold coins for the first time into circulation, and they refused to accept anything except metallic currency in payment for public lands. Van Buren's defeat for reelection by the Whig candidate, William H. Harrison, in 1840, proved to be only a temporary setback to the financial policy of the Democrats, who returned to power in 1844. The period ends with the emergence, that year, of new political issues, notably that of the annexation of Texas, foreshadowing war with Mexico and a reopening of the slavery controversy.

Two causes were responsible for the large number of private issues in copper, brass and white metal during this period. In the first place, the suffrage had recently been broadened and there was a general shift from the choice of presidential electors by legislatures to our present system of direct vote by the people. This change in political methods stimulated a corresponding popularization of one of the two main branches of numismatics, medals as distinguished from coins. Cheap and crudely executed campaign pieces, the forerunners of our present campaign buttons and pins, appeared possibly as early as 1824 and certainly by 1828, but in no great number until 1834. They were then first struck, with improved workmanship, on flans of approximately the size of the official large cent.

A second powerful stimulus to the production of tokens was provided by the economic depression to which the period owes its name. Times were intermittently "hard" from the winter of 1833-34 until 1842, being at their worst during the twelve months following May 10, 1837, when all the banks in the country were unable to meet their obligations. Jackson's radical reforms were unsettling in themselves, and their effects were deliberately aggravated by the Bank of the United States in the hope of either frightening or overturning the administration. Credit, moreover, had been greatly overextended, both at home and abroad, and a severe reaction was in any event due. The attendant discrediting of large banknotes and hoarding of gold left, as the only medium available for current cash payments, subsidiary silver, or, when this also was hoarded, "shinplasters" for small amounts, issued by municipalities, individuals or banks. This, in turn, made it necessary to use copper pieces for small payments formerly made in silver. There was also a great increase in the number of articles, such as penny newspapers, which were priced at less than the silver half dime. The result was to create a demand for copper money, which the official coinage was unable to meet. Private enterprise rose to the emergency by issuing pieces of the size, and usually in the metal, of the contemporary large cent.

The tokens selected by Low for his list were usually, although not always, of this size. In addition to many Merchants' Tokens, he included some fifty which carried political propaganda, and about half that number of pieces which were issued only as a circulating medium and did not advertise at the same time either a business firm or product, or a political candidate, party or cause. The tokens are classified and dated and their historical allusions explained in vols. 5, pp. 2, 6, 147, and vol. 6, p. 17, of the COIN COLLECTOR'S JOURNAL (April and July, 1938, January and April, 1939.)

HARD TIMES TOKENS

Fully described by the late Lyman H. Low in a pamphlet last published in 1900. The Merchants tokens described by Mr. Low are listed in our special catalogue of that series. We have retained the Low numbers on the political tokens in order to avoid confusion.

Fine .25 V. Fine .50
- 49 Half Cent token. Copper.
Fine .50 V. Fine 1.00

- 50 American Silver 25 Cents. Feuchtwanger metal.

Mr. Low's libel on this token is entirely uncalled for as it bears no resemblance to the other so-called Bushnell tokens—24, 25, 26, 27, 41, 42, 43. The piece is undoubtedly a product of Feuchtwanger the originator of the "American Silver Composition." Furthermore it is not in silver but in Feuchtwanger's metal. Now in the collection of Wayte Raymond

MERCHANTS' TOKENS 1850 - 1863

So many collectors have asked us to include these tokens that we publish them herewith. We do not consider that they come in the same category as the earlier tokens, since most of them were not used as a medium of exchange. They do, however, represent an interesting phase of early advertising.

CIVIL WAR TOKENS AND CARDS

Also Known As COPPERHEADS AND REBELLION TOKENS

Arrangement by Joseph Barnet, Brooklyn, N. Y.

These very interesting pieces were privately issued from 1861 to 1864, and most of them were current, owing to the scarcity of minor coins.

They were issued in 22 States and 396 Towns, and struck in copper, brass, nickel, copper nickel, white metal, lead, zinc, tin, silver and german silver, but copper was chiefly used.

There are 8,961 different varieties known at present, (1,324 tokens of patriotic design and 7,637 cards). There are 114 with the head of Washington, and 47 tokens and cards with the head of Lincoln.

Lincoln Civil War Tokens

ENCASED POSTAGE STAMPS

Patented by J. Gault, 1862

The great scarcity of small change during the Civil War made these stamps, encased in a metal frame, very popular. Many concerns used them as an advertising medium and placed their names on the back in embossed letters.

Prices are for very fine specimens with mica intact.

**Domestic Coin Manufactured by Mints of the United States
Since Organization to Include the Year 1935**

Coinage during the early years is not susceptible of exact statement by years of actual date on coin, the registry of annual coinage being of coin delivered by the coining departments of mints within the given year, and these deliveries not having been invariably completed within the year of the date on coin as now required.

The following pages are reprinted from the pamphlet "Domestic Coin Manufactured by Mints of the United States" compiled by the office of the Director of the Mint.

For sale by the Superintendent of Documents, Washington, D. C.
Price 5 Cents.

Also available at the same source and price—

"Information relating to United States Coins and Medals." Prepared under direction of the Director of the mint.
